sending and displaying said business plans to said certified resource providers for deciding whether said certified resource providers take in part in the said business plans, and if said certified resource providers cooperate in accordance with the match provide by said electronic hub system, and then said electronic hub system help the said certified resource providers communicate each other or make contrasts.

Claim 2. (Previously Presented) The method according to claim 1 further comprising establishing an electronic contract for said resource provider.

Claim 3. **(Currently Amended)** The method according to claim 1, wherein said electronic hub system comprises an electronic hub ~~and a data storage device.~~

**Claim 4. (Canceled)**

Claim 5. (Previously Presented) The method according to claim 4, wherein said databases comprise:

a resource database and said record of said resource provider stored therein;

a certified resource database having said record of said certified resource provider certified with said items;

a business model database having a plurality of business models of enterprises;  
and

a plan database having at least a business plan combining said record of said resource provider with said business models of enterprises.

Claim 6. (Previously Presented) The method according to claim 5, wherein said matching step further comprises a step of

defining a priority of said business plans according to similarities to said business models of said certified resource providers;

saving said business plans in said electronic hub system;

sending said business plans to said resource providers certified; and

displaying said business plans.

Claim 7. (Original) The method according to claim 1, wherein said resource provider comprises a capital provider.

Claims 8-10 **(Canceled)**

Claim 11. (Original) The method according to claim 1, wherein said items comprises an official document related to said resource provider.

Claim 12-13. **(Canceled)**

Claim 14. (Original) The method according to claim 1, wherein said communicating step comprises:

- logging in said electronic hub system;
- selecting a class for said resource provider;
- selecting a scope for said resource provider;
- assigning an identification number to said resource provider; and
- saving said record of said resource provider in said electronic hub system.

Claims 15-25. **(Canceled)**

Claim 26. **(Currently Amended)** A system for efficiently establishing companies and factories through a world-wide Internet, said system comprising:

- a data storage device having a plurality of databases built therein for storage records related to resource providers or business\_models; and
- an electronic hub electronically connected to said data storage device for examining and matching said resource provider, said electronic hub configured to

cooperate with said data storage device to:

communicate with a resource provider and providing a plurality of items of said resource provider to said system by said resource provider for examining, wherein said a plurality of items forming a business model;

examine said a plurality of items of said resource provider by said electronic hub system thereby certify certifying said resource provider as being able to provide at least one selected from the group consisting of capital, land, building rental, management groups, regulation, administrative ideas, and business plans and to confirm said resource provider's reliabilities;

save a record of said certified resource provider along with the data regarding the certify items in said data storage device;

match said resource provider according to said record of said resource provider with other certified resource providers having a record saved in said data storage device, comprising:

collect and analyze the stored records of stored certified resource providers in said electronic hub system for implementing matches with said record of said certified resource provider;

implement matches and forming business plans for said certified resource providers according to similarities to business models of said certified resource providers, wherein said business plans are created or select from said electronic hub system base on request of said certified resource providers; and

send and display said business plans to said certified resource providers for deciding whether said certified resource providers take in part in the said business plans.

Claim 27. (Previously Presented) The system of claim 26, wherein said electronic hub is further configured to establish an electronic contract of said resource provider.

Claim 28. (Previously Presented) The system of claim 26, wherein said plurality of databases comprise:

a resource database for registering said resource provider;

a certified resource database having said record of said certified resource provider with said items;

a business model database having a plurality of business models of enterprises;

and

a plan database having at least a business plan combined said record of said resource provider with said business models of enterprises.

Claim 29. (Previously Presented) The system of claim 28, wherein said electronic hub is further configured to:

define a priority of said business plan according to similarities to said business models of said certified resource providers;

saving said business plans in said plan database;

sending said business plans to said certified resource providers; and

displaying said business plans.

Claim 30. (Previously Presented) The system of claim 28, wherein said electronic

hub is further configured to:

- log in said electronic hub for said resource provider;
- select a class for said resource provider;
- select a scope for said resource provider;
- assign an identification number to said resource provider; and
- save said record of said resource provider in said resource database.

Claims 31-39. **(Canceled)**
